The BBGR constructs a Quarterly State Sales and Use Tax Collections Index (WFSUT) for the Wichita Falls area. As indicated in Chart 3, state sales and use taxes began falling in mid-year 2009, but have risen steadily since mid-year 2010. From the chart it should be noted that current receipts appear to be growing in line with the long term growth trend, which is the growth trajectory based on a ten-year exponential trend.
