Course Overview: This course will investigate (1) The delivery of health care needs/services of selected populations in the US and the UK; (2) Description of health disparities and measurement issues; (3) Determinants of health disparities: politics and health insurance coverage, economics, social and physical environmental factors, emerging infectious diseases, behavioral and emotional variables; (4) Impact of vulnerable populations such as the aging populations, increased racial and ethnic diversity and technological developments; and (5) Public health assessment, intervention strategies including advocacy efforts and evaluation results.

Course Objectives: At the completion of the course, students will:
1. Demonstrate, through field trips, how public health and health care are different in the US and UK, both nationally and at the local level;
2. Describe, through assignments, the differences in the current images, definitions, and determinants of health;
3. Demonstrate, through fieldwork interviews and projects, how we measure the value of public health efforts;
4. Demonstrate through the collection of data many of the determinants of health and the possible solutions to improve health;
5. Differentiate, through discussion, health disparities and health dissimilarities, and health status disparities and health care disparities;
6. Compare and contrast, through participation, the demography and the epidemiological profiles of vulnerable and global populations;
7. Identify, through participation, current trends and developments that impact the gap in public health and health care among vulnerable populations.
8. Identify whether the health brochures distributed to patients at local hospitals and health facilities meet the health literacy requirements set by the US CLAS mandates;
9. Demonstrate, through participation, future challenges and proposed solutions to the Healthy People 2020 Goal of eliminating health disparities.

Texts: An optional book that will be used during class is Global Health Disparities by Enku Kebede-Francis (2011) published by Jones & Bartlett. Students are encouraged to bring a camera. A tape recorder or camcorder is optional for fieldwork. Students are strongly encouraged to review the following items prior to leaving for London. Do not print these. They will be provided on flash drives.
• HHS Action Plan to Reduce Racial and Ethnic Health Disparities. Available at: http://minorityhealth.hhs.gov/npa. Go to the middle of the page to find this document. Note there are blank pgs between each chapter

• Healthy People 2020 brochure (6 pgs). Available at bottom right of this website: http://www.healthypeople.gov/2020/default.aspx

• Go to https://www.thinkculturalhealth.hhs.gov/ and click on Communication Tools across the top of the website. Watch Part 1 and 2 of the videos on the right side of the webpage.

• Milestones in Public Health (285 pgs). This will only be used as reference book. http://www.asph.org/userfiles/milestones/Milestones_in_Public_Health.pdf

• Other readings and links as provided by the professor.

Teaching Strategies:
Lecture, online and panel discussions, electronic journaling, composition, class presentations, films, and participation in field trips and fieldwork interviews and projects

Grading:
The following criterion referenced grading is used.

- Class Participation: 10%
- Electronic Journaling: 5%
- Fieldwork Interview Paper: 10%
- Research Paper: 25%
- Class Presentations: 30%
- Final Exam: 20%
Class Participation:
Class attendance is strongly advised since examinations will be based upon material discussed in class. All reading material must be read prior to class for full topic discussion. It is strongly encouraged to inform the professor in advance of any need to miss class (phone message or email is ok) and it is advisable to ask another student to take good notes and pick up handouts. An unexcused absence for a day will result in the reduction of a grade by a letter. It is acceptable to have students audiotape lectures, but students should always ask guest speakers before recording. Students will be held accountable for all material presented in class.

Electronic Journaling:
A personal electronic learning journal is an ongoing developmental record of student’s reflections on weekly learning. It is not a record of events or activities, but of individual responses to the activities. Students need to express links between the course concepts and personal interests and the student’s intended area of practice. Students must email their weekly journal entry as a Microsoft Word reflecting the week's experiences by 5:00PM each Friday. It is best to write what first comes into your consciousness. Spontaneous reactions tend to tell you more about yourself than well thought-out comments. The contents of each journal will be considered confidential and not shared with anyone!

Use the following prompts/questions for the electronic journal:

- What I have found difficult about what I have read/ heard/experienced this week is...
- How is what you are currently reading or experiencing challenging you?
- How have your perception(s) about health, healthcare, and your responsibilities changed?
- What are you learning about yourself from what/how you are reading/viewing/studying? (your own values, attitudes, and beliefs)
- Write down 3 questions you have about what you are currently reading/studying and what prompted those questions.

Fieldwork Interview Paper:
The purpose of this assignment is to help students gain an understanding of the nature of vulnerability from the point of view of a person who is culturally different from themselves, and who considers him/herself a member of a vulnerable population (whether or not the person feels vulnerable personally). It is critical to the experience to interview someone from a different racial or ethnic group or a group that is different based on a state of health (e.g., frail elderly, person with a history of substance abuse) from the interviewer. A list of questions and a grading rubric will be provided for this structured interview regarding the person’s experiences with the NHS. Papers are to be no more than 4 typed pages. More details will be provided during the first day of class.
Overview of Class Presentations (total 30%):

• Advocacy (5%). Each student will choose an advocacy effort and make a brief 5-minute oral presentation in class about who they are, what they do, who the sponsors/affiliates are, where their money comes from, and where it goes.

• Photo Novella (10%). Each student will do a photo novella presentation using photo sets and a narrative defining an aspect of public health.

• Pro MED Presentation (5%). Each student will do a brief oral presentation on a disease outbreak of his/her choice from a weekly tracking of Pro MED.

• Literature Review with Bibliography (10%): Each student will participate in a behavior change project throughout the month in London and will work on it after return home as part of the final Research Paper. Students will present a topic of interest related to determinants of health, health promotion, disease and illness reduction, and their behavior change project. These will be 15-minute presentations, including time for questions from classmates. The topic must be approved by the professor prior to the midterm break and should be based on the community assessment. Students should prepare an abstract page with a summary of what you plan to do and provide the information to all classmates and the teacher on the day of presentations.

Research Topic/Paper:
A research paper of no more than 8 typed pages (excluding bibliography) is required. The paper should include an overview of a specific health status or healthcare disparity as a problem statement, a literature review (as presented in class), and recommendations to address the problem (behavior change project).

Completed papers will be due in electronic form by September 14, 2016 to the professor of record. All work must be in APA 6th edition writing style. This is a required portion of the class to receive credit for the course. Failure to submit the paper by the due date will result in a failing grade for the course.

Final Exam:
The final exam will be comprehensive and will consist of 50 multiple-choice questions. If a student is unable to attend the exam, the student must call at least 2 hours in advance to rearrange for a make up time. The make up exam will be an alternative version of the exam.
